

BoxView™ IDE

BoxView IDE is a development environment supporting all of your ZSP needs. Programmers can create, test and debug applications with fast data access and extensive display capabilities. A typical debugging environment consists of the BoxView IDE running on a host, the host connected to any Domain Technologies' emulator, and the emulator connected to the target DSP. During testing, the simulator can be used when the target DSP is not available.

BoxView™ IDE

Domain Technologies, Inc.

BoxView IDE Features:

- **Project Management:**
 - Project Dependencies
 - File Compile Options
 - Timesaving Edit Features
- **Project Debugger:**
 - ASM/C Mix Source Views
 - Fast Data Access
